# Westhaven-Elmhurst Community Association SkillsLink Audio Workshop

Participants in the Westhaven-Elmhurst Community Association&#039;s SkillsLink program came to the Library for one afternoon during March for a crash course in audio recording and editing using Audacity, an open source software. After learning how to download and install the program, participants played with tracks provided by musician and workshop facilitator James Irwin, mixing and recording their own audio over top. Check out a couple of their practice tracks here:
